Shreya Mangesh Jadhav

Satara, Maharashtra, India | jadhavshreya010@gmail.com | github.com/your-shreya99 | linkedin.com/in/shreya-jadhav

Career Objective

Final-year B.Tech student in Artificial Intelligence and Data Science with foundational skills in SQL, Python, and data analysis. Experienced in academic projects involving data validation, database management, and dashboard-based reporting. Interested in business analysis, KPI tracking, and translating data into actionable insights to support data-driven business decisions. Eager to contribute analytical thinking, problem-solving, and collaborative skills in a Business Analyst internship.

Skills

- **Data Analysis:** Python, SQL, Microsoft Excel, Advanced Excel, Power BI, Pandas, NumPy, Data Cleaning, Data Validation, Data Profiling, Missing Value Treatment, Duplicate Handling
- **Reporting & Visualization:** Matplotlib, Seaborn, Google Sheets, Dashboard Reporting (HTML/CSS, React)
- **Business Analysis:** Problem-Solving, Data Interpretation, Trend Analysis (foundational), Database Management
- **Tools & Frameworks:** Scikit-learn, Flask, Node.js, Express, MongoDB
- **Familiar With:** Machine Learning, Deep Learning , TensorFlow / PyTorch
- **Professional Skills:** Analytical Thinking, Teamwork, Communication, Report Writing

Projects

Log Anomaly Detection System (LogGuard) 3rd Mini Project Year

BERT-based NLP system for detecting unusual patterns in system logs

- Cleaned, validated, and prepared raw log data to identify patterns and improve anomaly detection accuracy
- Built with PyTorch, HuggingFace Transformers, and FastAPI, with a custom HTML/CSS dashboard for anomaly review

Smart Portable Attendance System 3rd Year – Interdomain Project

Fingerprint-based attendance tracking system with real-time sync

- Hardware: ESP8266 / R307 fingerprint sensor; Backend: Node.js, Express, MongoDB for reliable record keeping
- Integrated Google Sheets sync and a React-based teacher dashboard for attendance monitoring and reporting
- Applied data validation and duplicate-entry checks to maintain accurate, clean attendance records

Soil Moisture & pH Detection Device 2nd Year Mini Project

Hardware-based IoT device to monitor soil health parameters

- Used sensor data and embedded systems for real-time monitoring, solving a practical environmental problem

Education

Yashoda Technical Campus, Satara 2023 – Pursuing
B.Tech in Artificial Intelligence and Data Science SGPA: 7.1 (current)

Yashwantrao Chavhan Institute of Science, Satara 2023
HSC Percentage: 51.00%

MKSSS's Kanya Shala, Satara 2021
SSC Percentage: 80.00%

Certifications

- **Prime: AI/ML Batch** – ApnaCollege (2025) – Structured course covering Python, Machine Learning, and Deep Learning fundamentals

Activities

- Participated in 3 hackathons, building rapid prototypes and collaborating in teams
